

Quality Laboratory Consumables

## Blue GEB, Your Better Choice

### Innovative Labware for Optimized Liquid-handling

- Precise & Accurate Liquid Pipetting
- Minimized Liquid Retention
- Maximized Compatibility & Flexibility

# 2014/2015

- **Robotic Tips**  
For Optimizing the Performance of Robotic Systems
  - *Thin Wall Crown Robotic Tips*
  - *Low Retention Robotic Tips*
  - *Dual Resin Robotic Tips*
- **PCR Series**  
For Optimizing PCR Precision And Minimizing Aerosol Contamination
  - *Dual Resin PCR Tubes and Caps*
  - *Low Retention PCR Tubes*
- **Universal Fit Pipette Tips**  
For Optimizing Pipetting Precision
  - *Thin Wall Crown Pipette Tips*
  - *Low Retention Pipette Tip*
- **Tubes**  
Super Leakproofness
  - *Dual snaplock Microtubes*
  - *Dual Resin Screw Cap Tubes*
- **Reservoirs**  
High Performance of liquid Reservoiring
  - *Low retention Liquid Reservoirs*
- **Sealing Mats**  
Excellent Seal Effects
  - *O ring Heads Sealing Mats*
  - *Dual Resin PCR Caps*

# LABORATORY CONSUMABLES

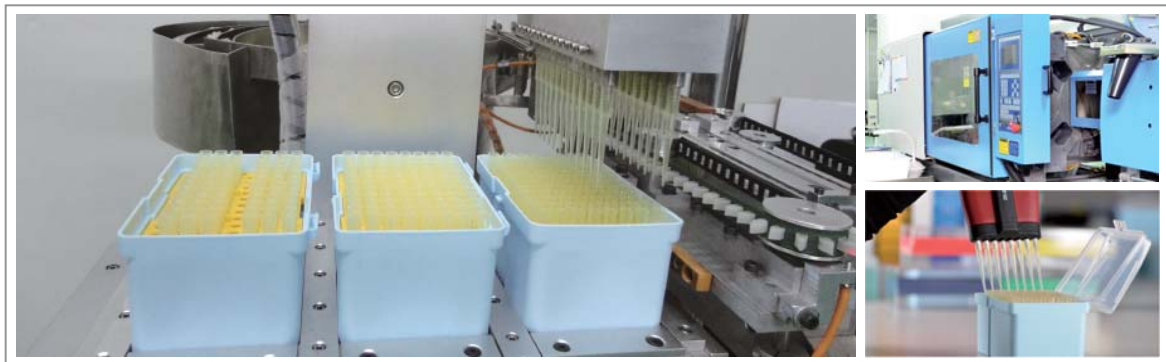

# Gene Era Biotech, Ltd.

## Global Leading Manufacturer and Supplier for Both Laboratory and Clinical Diagnostics

Since its inception, GEB has committed to manufacture and supply superior laboratory consumables to our customers.

All our products are designed by experienced engineers, and produced in the dust-free clean facility under strict manufacturing processes with premium materials. Before delivering to our customers, all products are accessed by a stringent QC process certified by ISO 9001:2008, ISO13485:2003, and ISO14001:2004, to assure the highest quality. We guarantee that all products are DNase/RNase, and pyrogen-free to meet the highest standard of both laboratory experiment and clinical diagnostics.

Through the enduring efforts in the past few years, GEB has grown to become one of the global leading manufacturers and suppliers of consumables for laboratory and clinical diagnostics. We will continually assure our customers with best products and services.

## Table of Contents

<b>Robotic Tips</b>	<b>01-33</b>
Agilent / Agilent Bravo	02-03
Beckman FX / NX, Multimek AP96 and Biomek 3000	04-07
Hamilton Star, Starlet and Nimbus	08-13
Tecan Genesis Freedom   Freedom Evo®   Miniprep with LiHa	14-19
Tecan Mca	20-21
Janus®   MultiProbe	22-25
Olympus	26-27
Rainin	28
Zymark®, Zymark Rapidplate/Sciclone	29-30
Cybi®, CyBi®-Well Family, Cybi®-Well; Cybi®-Well Vario; Cybi®-WellFlex; Cybi®-WellFlex Vario	31-32

<b>Reservoirs</b>	<b>53-57</b>
<b>Sealing Mats</b>	<b>58-61</b>

## GEB's Solution

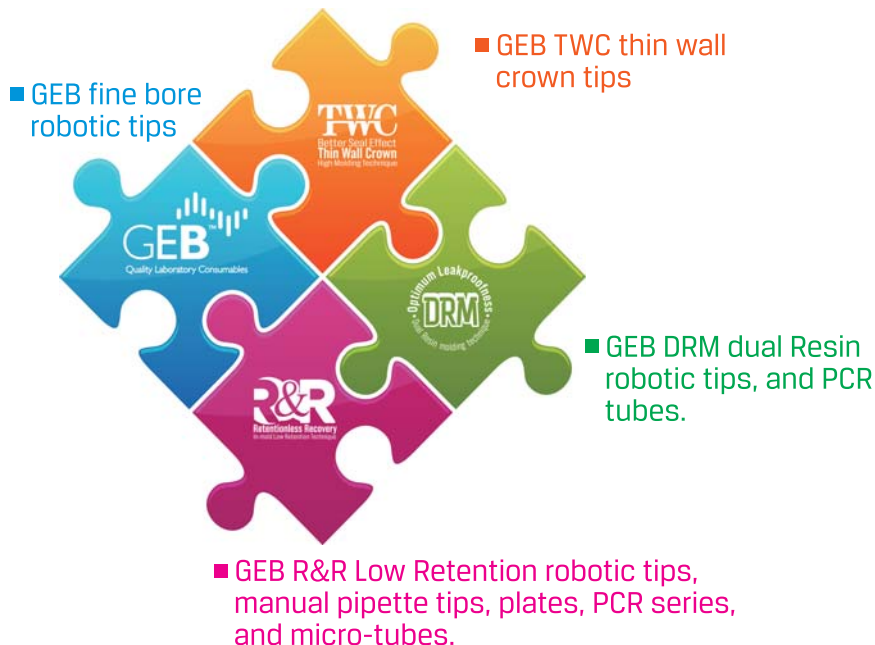

### GEB's SOLUTION for Micro-volume Liquid Handling

Micro-volume liquid handling is a critical issue in terms of laboratory accuracy and precision.

Less than 0.5  $\mu$ l of biologic solution is difficult to transfer accurately due to:

- Surface retention by tips, tubes, or reservoirs.
- Hanging drops and need for touch-off at the distal end of a tip with standard bore.

GEB's series innovation provides you a complete solution for handling a micro-volume biological solution.

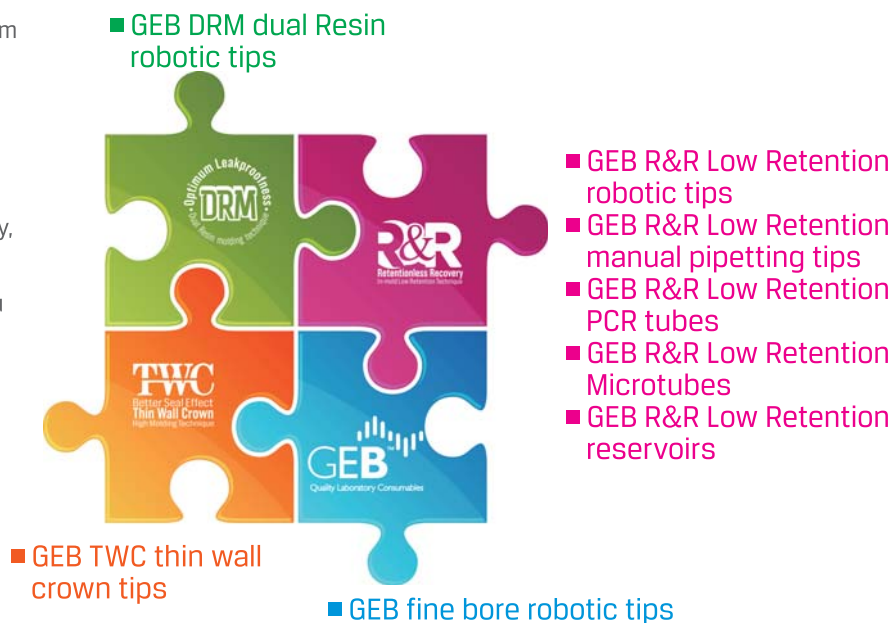

### GEB's SOLUTION for Accurate and Precise Reaction System Preparation

Accurate and precise reaction system preparation is not an easy task.

- Optimized tip fit is critical in terms of precise volume of liquid transferring.
- Reduced surface retention increases precision, reproducibility, and saves on reagents.

GEB's series innovation provides you a complete solution.

# GEB's Genuine Quality

## Certification

ISO9001:2008 • ISO13485:2003 • ISO14001:2004 • CE

## The Highest Standard of Quality Assurance

## The Highest Standard of Manufacturing

100,000 Grade Clean Workshop

International Standard Molding Machine

# Blue GEB, Your Better Choice

Excellent match of liquid workstations & GEB robotic tips

## Robotic Tips

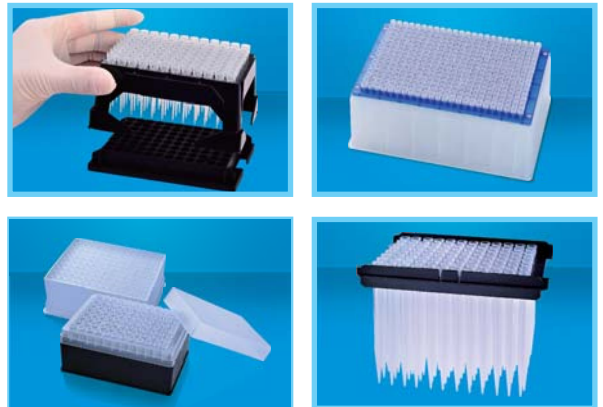

### Accurate Liquid Handling

Genomics • Proteomics • Cellomics • Immunoassays • Metabolomics • General liquid handling

#### GEB DRM Dual Resin

Provide high flexibility for better fitting, lowering robotic head insertion force.

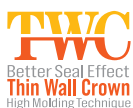

#### GEB TWC Thin Wall Crown

It provides you a better seal effect for robotic systems, and is more flexible and requires less insertion force.

Reliable, consistent and accurate sample preparation and delivery have become more critical than ever to ensure you to operate your robotic system with high accuracy, low waste, and more economy.

So, why don't you place your disposables from GEB, which will provide you so many options of robotic tips with high quality and innovation of thin crown wall technique, fine bore, GEB's exclusive Low Retention, and dual resin molding technique?

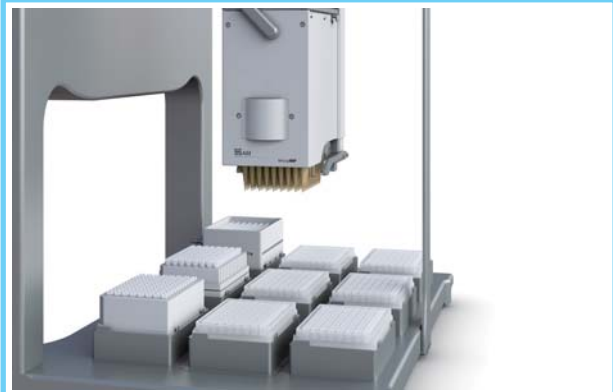

Provide a safer double safe cap lock system  
Provide a flexible half-lock position to prevent liquid evaporation during reagents pipetting

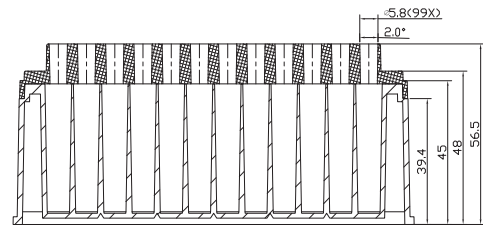

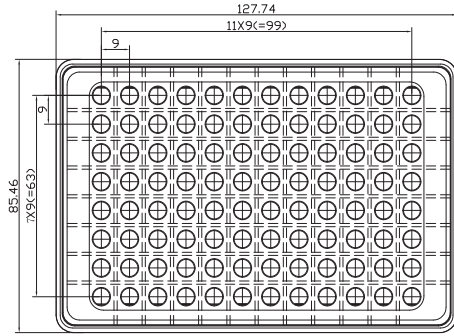

Minimize sample and reagent retention  
Guarantee reaction system accuracy and precision

Compatible with  
**Agilent / Agilent Bravo**  
**ROBOTIC TIPS**

Format: 96-tip format  
Tip Volume range selection: 5~250µl  
Material: Natural Polypropylene  
Alternatives:  with/without aerosol-barrier filter  
 Pre-Sterilized/Non-Sterilized  
 Low Retention/Standard  
Certified: DNase-Free, RNase-Free, Endotoxin-Safe

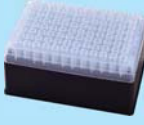

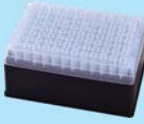

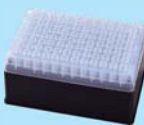

Material: Number 5 Polypropylene

250µl | Compatible Head: 96LT & 8LT

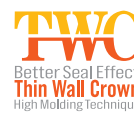

**Packaging Specification:**  
96 tips/rack, 10 racks/pack, 5 packs/case

Tip Type	Max Volume	Tip Color	Rack	Packaging	GEB Cat#
 Non-Filtered, Non-Sterilized	250µl	Natural		Racked	AT250A-9-N
 Low Retention Non-Filtered, Non-Sterilized	250µl	Natural		Racked	AT250A-9-N-LB
Non-Filtered, Pre-Sterilized	250µl	Natural		Racked	AT250A-9-N-S
 Low Retention Non-Filtered, Pre-Sterilized	250µl	Natural		Racked	AT250A-9-N-S-LB
 Filtered, Pre-Sterilized	170µl	Natural		Racked	AF250A-9-N-S
 Low Retention Filtered, Pre-Sterilized	170µl	Natural		Racked	AF250A-9-N-S-LB

# PCR Series

## Optimum Accuracy and Reliability

Solution for Accuracy and Reliability of PCR Results

Gene Diagnosis • Drug Discovery • Genomic Research

### GEB Exclusive DRM Dual Resin PCR series

**DUAL RESIN PCR** products provide greater ease of closure and increased seal integrity; "ZERO" evaporation and reduced "edge-effect" prevent aerosol contaminants and subsequent false positive PCR results.

### GEB R&R Low Retention PCR series

GEB's **R&R** Low Retention PCR Tubes/Plate provide you a super uniformity and consistent retentionless surface to create a **RETENTIONLESS RECOVERY** effect during your samples and reagents handling.

GEB keeps researching and developing technique for less sample retention and less electrostatic violence and better leakproofness so as to guarantee the PCR result accurate.

Minimize sample and reagent retention  
Guarantee reaction system accuracy and precision

Provide a better seal effect  
Be more flexible to fit robotic pipetting head or manual pipettors

# Universal Fit Pipette Tips

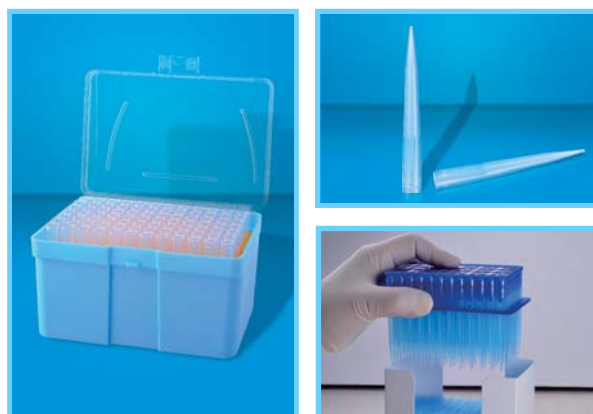

## Better Tips for Improved Flexibility

Our innovation guarantees your pipetting with improved accuracy and flexibility

### GEB TWC THIN WALL CROWN

Pipette tips provide you a better seal effect for pipettors, and are more flexible and require less insertion force.

GEB produces pipette tips with exclusive techniques of TWC Thin Wall Crown and R&R Low Retention so that the cooperation between pipettor and tip is optimized.

The liquid handling will be more accurate and flexible with GEB pipette tips.

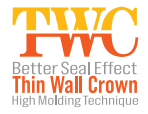

Provide a safer double safe cap lock system  
Provide a flexible half-lock position to prevent liquid evaporation during reagents pipetting

Minimize sample and reagent retention  
Guarantee reaction system accuracy and precision

Tips Compatible for a wide range of pipettors  
**Universal Fit**  
**Pipette Tips without Aerosol Barrier**

## Tubes

### Optimum Sample Handling

Optimum safelocker design, high quality virgin resin, R&R GEB retentionless recovery technique, etc., will help you to optimize your sample handling.

-----  
Proteomics.drug R&D.genomics.HTS

GEB **DUAL SNAPLOCK** system provides you double cap lock for micro centrifuge tubes with a safer leakproofness to protect your reaction systems or biological solutions.

**DUAL SNAPLOCK** system also creates a "half lock" status which provides a flexible position during your multiple reagents processing steps.

Unique O-ring integrated design ensures better protection for your reagents

#### Features:

- Glass-like transparent tubes are also available in seven additional colours.
- Snap-lock tubes are guaranteed to stay closed, even during boiling or autoclaving.
- Withstand up to 20,000 RCF.
- Snap-lock cap ensures efficient seal, yet is still easy to 'flip' open.
- Thin membrane in the caps centre allows easy piercing by syringe needle.
- Certified RNase, DNase, protease and endotoxin-free for total sample integrity.
- Apparent scale identification to facilitate control of liquid volume.

## Reservoirs

### Optimum sample collection and storage

GEB exclusive R&R Low Retention technique provides Reservoirs with the optimum sample and reagent saving effect

High Throughput Screening(HTS)•Samples & reagents storage

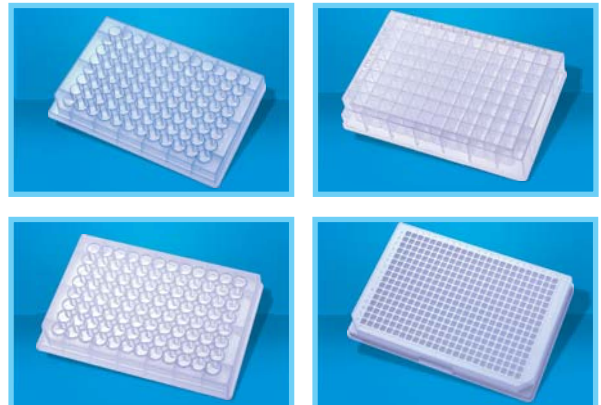

### O-ring

Special designing of O ring which optimizes leakproofness and makes closing and opening more easily.

### GEB R&R Low Retention Technique

GEB's **R&R** liquid reservoirs provide you a maximum saving effect for biological solutions including samples and reagents to guarantee accurate and repeatable results.

#### Features:

- Polypropylene can be autoclavable at 121°C and it is also long-term stable at -80°C.
- U-shaped and V-shaped bottom outlet series most suitable for mixing and collection of samples.
- Alphabetical sorting and cut angle mark for convenient tracking of samples.
- Applicable to multi-channel pipettors and automation systems.

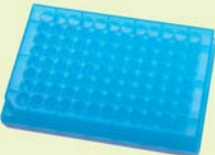

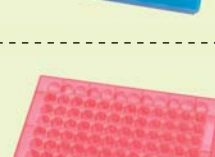

## Deep Well Plates 96 Round Well Series

330µl Deep-well plate, Round well-V bottom  
Made of virgin polypropylene

# Sealing Mats

## Optimum Leakproofness

Drug discovery • Molecular biology • Cell biology

### Exclusive Designed O ring

GEB Seal Mats for Deep Well Plates & Sample Tubes have an exclusive O ring structure, which makes GEB Seal Mat seal a plate more easily with a perfect sealing effect.

#### Features:

- The most complete line of sealing products in the industry, for the most choices.
- EasyPress and MiniSealer offer easier-operating and time-consuming options.
- A wide range of ImpermaMats offer unsurpassed protection for Volatile solvents.
- Films and mats can be used in a wide temperature range, they are suitable for most applications.
- Chemically resistant, pierceable thermoplastic elastomer well caps are excellent for storage to -80°C.
- Silicone pre-slit well caps permit a pipette tip or probe to enter the well without damage to the cap.
- Ethylene-vinyl acetate cap mats effectively seal polystyrene DeepWell™ plates.
